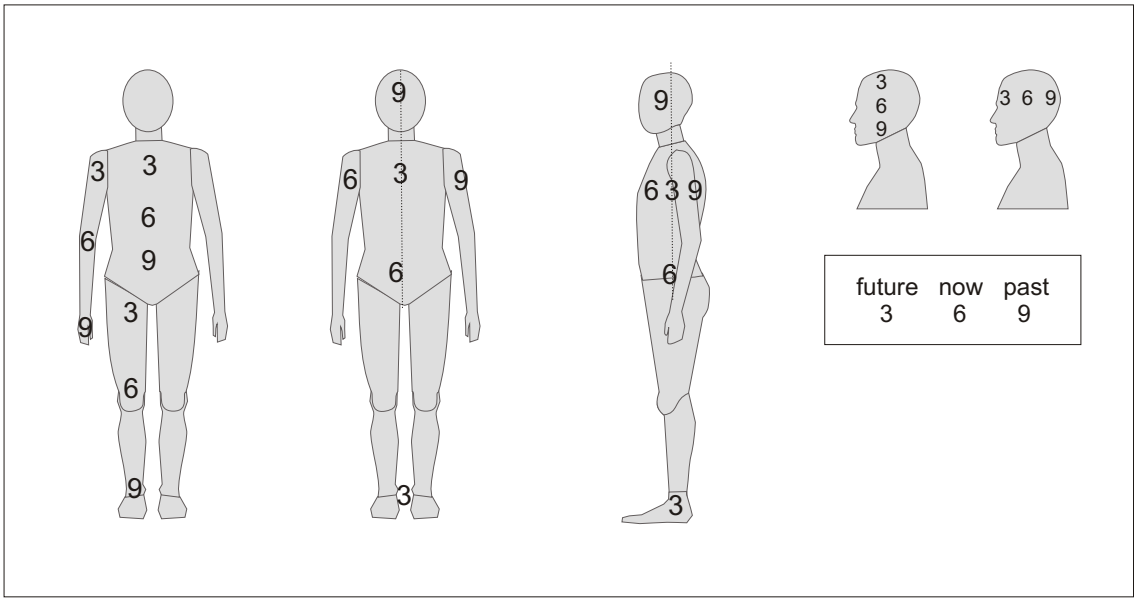
Manifestation of the numbers 3, 6 and 9 in the body and mind

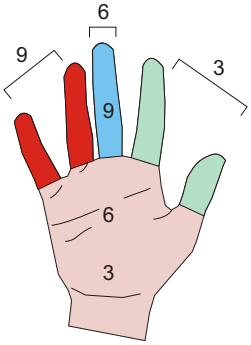
Gary Schweitzer Tong

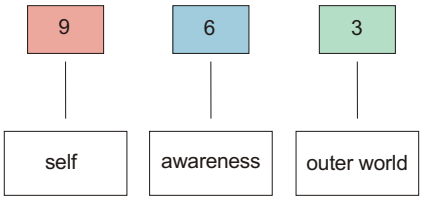
It must be noted that in certain ethnic and language groups the order of 3 6 9 is reversed. This page illustrates the pattern in European speakers. In Indian or Chinese speakers the order is exactly the opposite.

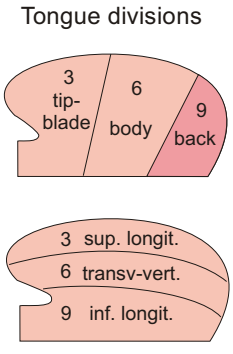
The whole body and it subdivisions can be trisected. In each region 3 6 9 can be mentally/kinesiologially perceived.

The head, legs or face can be grouped in this fashion and the three numbers are also functional in the basic mental frames.









The hand and fingers can be further divided into three regions with the three numbers appearing in each. Same action is applicable to the tongue revealing the key to phonetics, phonology and cognition in speech.
